**Gray Davis**  
*Governor*

## NOTICE OF PETITIONS REQUESTING CHANGES, CORRECTIONS, OR EXTENSIONS OF TIME IN WATER RIGHT PERMITS AND LICENSES

**Dated: November 15, 2002**

**NOTICE:** The purpose of this notice is to advise interested persons of petitions requesting changes to water right permits and licenses. This notice provides a summary of all petitions that have been reviewed and prepared for noticing during the month by the State Water Resources Control Board (SWRCB), Division of Water Rights (Division).

This notice provides a short summary of each petition and also provides instructions for filling a protest against the requested changes. If you would like additional information relating to a petition, or information relating to the procedure for filing a protest please call the contact person listed for the specific petition. The Division's public notices may also be viewed and printed from its web-site, [www.waterrights.ca.gov](http://www.waterrights.ca.gov).

**GENERAL INFORMATION:** Persons diverting water from a stream must, in most cases, obtain a water right permit issued by the SWRCB, in accordance with the provisions of the California Water Code. (People can divert water from a stream under riparian rights or rights initialed prior to 1914.) A water right permit issued by the SWRCB defines the:

- Stream or river from which water is diverted;
- Amount of water that can be diverted;
- Season of the year during which the water can be diverted;
- Point of diversion from the stream;
- Place of use of the diverted water; and
- Purpose of use.

In addition, the water right permit includes a date for applying the water to beneficial use. Any party having a water right permit must submit a petition and receive approval from the SWRCB to change the place of use, purpose of use, or point of diversion, or to request an extension of time to make full beneficial use of the water. The SWRCB must consider the potential impacts to other water users that could be affected by the proposed change and must also consider the potential environmental impacts that would result from the proposed change. The SWRCB must comply with the requirements of the California Environmental Quality Act prior to approval of any petition.

**PROCEDURES FOR FILING PROTESTS:** Any person may file a protest against the changes proposed in a petition. However, protests filed in response to this notice must be postmarked or received in the Division's office at the address listed below, by 4:00 pm on the 30<sup>th</sup> day after the date of this notice.

A protest should be submitted on the standard protest form that is available from the Division and can be printed from the Division's web-site [www.waterrights.ca.gov/forms/](http://www.waterrights.ca.gov/forms/). Due to the constraints of the noticing period, protestants may file protests, etc., by FAX. However, an original copy of all materials must be received, for the SWRCB to consider your protest. The protest should be submitted to:

State Water Resources Control Board  
Division of Water Rights  
c/o Greg Wilson  
P.O. Box 2000  
Sacramento, CA 95812-2000

Additionally, a copy of the protest must also be sent to the petitioner. SWRCB will respond to all protests within 90 day of the date of this notice.

A protest may be based on any of the factors listed below:

Injury to existing water rights;  
Has an adverse environmental impact;  
Is not in the public interest;  
Is contrary to law; or  
Is not within the jurisdiction of the SWRCB.

All protests must clearly describe the objections to approval of the petition and the factual basis for those objections. For example, if the objection is based on injury to existing water rights, the protest must describe the specific injury to the existing water right that would result from approval of the changes proposed by the petition. In addition, the party claiming injury to prior water rights must provide specific information that describes the basis of existing right, the date the use began, the quantity of water use, the purpose of use, and the place of use. Protest based on environmental impacts, public interest, legality, or jurisdictional issues must be accompanied by a statement of facts supporting the basis of the protest. If sufficient information is not submitted, the SWRCB may reject the protest or request that the protestant submit additional information. The Divisions will not accept protests that are directed against the underlying water right, rather than the change proposed by the petition.

The SWRCB may grant an extension of time to file a protest, for good cause. A request for an extension of time must be submitted in a timely manner, must specify the additional time required, and must state why additional time is needed to file the protest. A pamphlet is available that provides additional information relating to water rights and the procedures for filing protests. Please contact the person listed below if you would like a copy of the pamphlet or protest forms.

**RESOLUTION OF PROTESTS:** The petitioner and protestant are encouraged to meet and discuss methods that could be used to resolve the protest. If the protest can not be resolved, SWRCB staff may conduct a field investigation with all interested parties or may hold a water right hearing.

**CONTACT PERSON:** Please contact the staff person designated under the petition of interest, if you would like additional information regarding the petition, protests, information pamphlets, protest forms, or to request an extension of time in which to file a protest.

**DESCRIPTION OF PETITIONS:** The following provides a summary of all petitions for changes in water rights or extensions of time to put water to use. The petitions are listed alphabetically by County.

COUNTY	OWNER	APPLICATION NO.
LAKE	Charles and James Carpenter	24482A
MENDOCINO	Millview County Water District	3601 & 17587
	City of Ukiah	15704
	Willow County Water District	15721 & 17232
	La Ribera Vineyards	20540 & 24013
	Richard Henwood	21516
SANTA CRUZ	Big Basin Water Company	24804

## NOTICES WITHIN THE COUNTY OF LAKE

---

**APPLICATION 24482A      PERMIT 18067A      ISSUED ON October 6, 1980**

---

Permittee: Charles and James Carpenter  
200 N. Main Street, Suite C  
Lakeport, CA 95453

Source: Unnamed Stream tributary to Scotts Creek thence Rodman Slough the  
Clear Lake, thence Cache Creek

Point of Diversion: NW<sup>1</sup>/<sub>4</sub> of SE<sup>1</sup>/<sub>4</sub> of section 11, T14N, R10W, MDB&M

Purposes of Use: Irrigation, Frost Protection, Recreational, and Stockwtering

Storage Amount and

Season of Diversion: 90 acre-feet from October 1 to June 30 of the succeeding year

Max Annual Amount: 90 acre-feet per year

Place of Use: Recreation and Stockwatering at the Reservoir located within N½ of SE¼ of section 11, T14N, R10W, MDB&M. Frost protection and Irrigation of 45 acres located within the SE¼ and NE¼ of NW¼ of section 11, T14N, R10W, MDB&M, as shown on maps on file with the SWRCB.

Existing Project: The existing project is permitted for the collection to storage of 90 acre-feet of water per annum to be used for recreational, stockwatering, and irrigation of 45 acres of pasture. Permittee is reconstructing the earthfill dam and installing new pumping facilities and distribution systems for development of the place of use (POU). Water will be pumped from the reservoir using two 350-gallon-per-minute pumps for overhead, drip system, and furrow irrigation of orchard, vineyard, and row crops.

Petition for Change: Permittee petitioned to add a total of 61 new acres to the existing 45-acre POU for a total of 106 acres. Of the 106 acres, 18 acres are in vineyard, 24 acres in pears, 19 acres will be in row crops, along with the permitted 45 acres in pasture all within section 11, T14N, R10W, MDB&M.

Extension of Time: Permittee requests an extension of time to develop full beneficial use of water authorized under this permit.

Environmental Document: An environmental document has not yet been prepared for the action described in this notice.

Contact Person: Ralph Gunby at (916) 341-5334

## NOTICES WITHIN THE COUNTY OF MENDOCINO

---

---

<b>APPLICATION 3601</b>	<b>LICENSE 492</b>	<b>ISSUED ON March 12, 1926</b>
<b>APPLICATION 17587</b>	<b>PERMIT 13936</b>	<b>ISSUED ON March 26, 1963</b>

---

Applicant: Millview County Water District  
3081 North State Street  
Ukiah, CA 95482

Source: Russian River (Underflow) tributary to Pacific Ocean

Points of Diversion: Application 3601  
North 32 West 2,300 feet from SE corner of projected section 5, T15N, R12W, MDB&M, being within NE¼ of SE¼ of said section 5.

Application 17587

Well No. 1 – South 83°58'43" West 3,432 feet from SE corner of projected section 33, T16N, R12W, MDB&M, being within the SE¼ of NE¼ of projected section 5, T15N, R12W, MDB&M.

Well No. 2 – South 60 45' West 3,588 feet from SE corner of projected section 33, T16N, R12W, MDB&M, being within the NE¼ of SE¼ of projected section 5, T15N, R12W, MDB&M.

Purposes of Use: Domestic & Municipal

Direct Diversion  
Rate and Season of  
Diversion:

Application 3601

0.18 cubic foot per second from June 1 to August 15

Application 17587

3 cubic feet per second from November 1 to July 1 of the succeeding year

Place of Use: Within the boundaries of the Millview County Water District (MCWD) located north of Ukiah and within projected sections 2-10 and 17, T15N, R12W, MDB&M, and projected sections 27-33, T16N, R12W, MDB&M, as shown on map on file with the SWRCB.

Existing Project: MCWD supplies water under License 492 (Application 3601) and Permit 13936 (Application 17587) for domestic and municipal uses to the MCWD service area within Mendocino county.

The Division conducted a routine compliance inspection of MCWD on December 17, 2001. As a result of the inspection, it was found that:

MCWD was diverting water from 17 shallow wells and 3 river intake pumps which are not covered under its license and permit,

MCWD was diverting water from the surface flow of the Russian River into a gravel recharge basin to elevate water levels at its wells, which is not covered under its license or permit,

MCWD was serving water to areas outside the authorized place of use under its license and permit, including the Calpella County Water District, and

MCWD was diverting water for irrigation use which is not covered by its license or permit,

The violations have been addressed by MCWD through the filing of petitions to change the point of diversion, place of use and purpose of use under License 492 and Permit 13936.

Petition for Change: Purpose of Use – MCWD has petitioned to add Irrigation to the authorized Domestic and Municipal uses listed in License 492 and Permit 13936. Irrigation water would serve ten existing agricultural service connections covering 100 acres of vineyard. In order to curb future irrigation development, MCWD has recently adopted a policy to prohibit the future use of water for commercial irrigation of crops over and above what is currently being irrigated

Point of Diversion – MCWD has requested the addition of two points of diversion along the Russian River and the addition to the well field defined during the recent inspection. The new points of diversion are defined as follows:

Upper Russian River Diversion (two pumps) – Located North 556,508 feet and East 1,660,210 feet, California Coordinate System, Zone 2; being within the NE¼ of SE¼ of projected section 5, T15N, R12W, MDB&M.

Lower Russian River Diversion (one pump) – Located North 556,243 feet and East 1,660,217 feet, California Coordinate System, Zone 2; being within the NE¼ of SE¼ of projected section 5, T15N, R12W, MDB&M.

Well Field – multiple wells within Mendocino County Assessor Parcel No. 178-03-11, consisting of 7.15 acres within the NE¼ of SE¼ of projected section 5, T15N, R12W, MDB&M, as shown on the map on file with the SWRCB.

Place of Use - MCWD has petitioned to amend its place of use to include water delivery to Calpella County Water District and other neighboring communities. In addition, MCWD has an Emergency Interconnection Agreement (EIA) with the City of Ukiah for the service of water. The agreement stipulates that if the other entity requires water on an emergency basis, with proper notice, water will be provided to the said entity. The intent of the EIA is to improve the reliability of water service to each entity's customers in times of an emergency and/or equipment failure, to combat a fire, to allow for maintenance or repair, or in the case of water system contamination.

The petition to expand the place of use requests that the licensed and permitted place of use be increased to include the City of Ukiah, Willow County Water District, and Calpella County Water District service areas, described as follows:

Within the boundaries of the City of Ukiah, and Millview, Willow and Calpella County Water Districts being within projected sections 15-17, 20-22 and 27-36 of T16N, R12W, MDB&M; Sections 1 and 12, T15N, R13W, MDB&M; sections 2-11, 16-21 and 28-33 of T15N, R12W, MDB&M; and projected sections 3-10 and 15-16 of T14N, R12W, MDB&M as shown on the map on file with the SWRCB.

Environmental

Document: An environmental document has not yet been prepared for the action described in this notice.

Related Applications: License 6793 (Application 15721) Willow County Water District  
Permit 13935 (Application 17232) Willow County Water District  
Permit 12952 (Application 15704) City of Ukiah

**APPLICATION 15704**

**PERMIT 12952**

**ISSUED ON October 24, 1961**

---

Permittee: City of Ukiah  
c/o Wagner & Bonsignore  
444 North 3<sup>rd</sup> Street, Suite 325  
Sacramento, CA 95758

Source: Russian River (Underflow) tributary to Pacific Ocean

Points of Diversion: (1) SE $\frac{1}{4}$  of NW $\frac{1}{4}$  of section 16, T15N, R12W, MDB&M  
(2) SE $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 17, T15N, R12W, MDB&M  
(3) SE $\frac{1}{4}$  of SW $\frac{1}{4}$  of section 16, T15N, R12W, MDB&M

Purposes of Use: Municipal

Direct Diversion  
Rate and Season of  
Diversion: 20 cubic feet per second from January 1 to December 31 of each year

Place of Use: Within and near the City of Ukiah as shown on the map on file with the SWRCB.

Existing Project: The existing project involves the pumping of groundwater, classified as Russian River Underflow, for Municipal use within and near the City of Ukiah. On occasion, the City supplies water to Millview and Willow County Water Districts through Emergency Interconnection Agreements (EIA) which are instituted whenever an emergency situation such as fire, contamination, or equipment failure occurs. Millview County Water District, in addition to its own needs, also supplies a portion of its water to Calpella County Water District. Unfortunately, there are no provisions within the City of Ukiah's EIA to allow for the use of EIA water in Calpella County's service area.

Seeking to remove the EIA completely and provide a more predictable water supply, the City of Ukiah has filed a petition to expand its Place of Use to incorporate the service areas of Millview, Willow, and Calpella County Water Districts with its permit.

Petition for Change: Permittee has petitioned to change the place of use under Permit 12952 to incorporate the service areas of Millview, Willow, and Calpella County Water Districts. The proposed place of use is described as follows:

Within the boundaries of the City of Ukiah, and Millview, Willow, and Calpella County Water Districts being within the following projected Sections 15, 16, 17, 20, 21, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36 of T16N, R12W, MDB&M; Sections 1 and 12, T15N, R13W, MDB&M; Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 16, 17, 18, 19, 20, 21, 28, 29, 30, 31, 32, and 33 of T15N, R12W, MDB&M; and Projected Sections 3, 4, 5, 6, 7, 8, 9, 10, 15, and 16 of T14N, R12W, MDB&M as shown on map on file with the SWRCB.

Environmental Document: An environmental document has not yet been prepared for the action described in this notice.

Applicant: Willow County Water District  
151 Laws Avenue  
Ukiah, CA 95482-6655

Source: Russian River (Underflow) tributary to Pacific Ocean

Points of Diversion: Wells #3, 5 and 6 located as follows  
South 1,800 feet and East 4,350 feet from point Y-45 on boundary of Yokayo Rancho, being within log 71 of Yokayo Rancho and the NW<sup>1</sup>/<sub>4</sub> of projected section 33, T15N, R12W, MDB&M

Purposes of Use: Municipal

Direct Diversion  
Rate and Season of  
Diversion:

Application 15721

1 cubic foot per second from January 1st to December 31st

Application 17232

3 cubic feet per second from November 1 to July 1 of the succeeding year

Place of Use:

Lots 45, 61, 67-74, 78 and 91 of Yokayo Rancho being within projected sections 28, 29, 30, 32 and 33, T15N, R12W, MDB&M and projected sections 4 and 5, T14N, R12W, MDB&M

Existing Project:

Willow County Water District (WCWD) supplies water under License 6793 (Application 15721) and Permit 13935 (Application 17232) to municipal users in the WCWD service area within Mendocino County.

The Division of Water Rights (Division) conducted a routine compliance inspection of WCWD on August 22, 2001. As a result of the inspection, it was found that WCWD was diverting water for use outside the authorized place of use covered by its permit and license. In addition, WCWD was found to be diverting water for irrigation use that is not an authorized use in either its permit or license. Lastly, the inspection determined that the Burke Hill Well Field site is not listed as an authorized point of diversion for Permit 13935 or License 6793. While WCWD has contested the finding that the new wells at the Burke Hill Well Field are drawing from a subterranean stream, WCWD recently agreed to amend the petition filed to change the Place of Use and Purpose of Use to correct the discrepancies found during the Compliance Inspection, to include the new well field as a Point of Diversion.

Petition for Change: Permit 13935 (Application 17232)

Extension of Time – WCWD has requested a 15-year extension of time, as they have not reached the anticipated build-out and predict future increases in both residential and commercial water demand. WCWD submitted a 15 year water use history from 1986 to present illustrating the gradual and continued increase in both the annual water use and number of municipal connections. Therefore, WCWD requests an extension of time to complete development of full beneficial use

License 6793 (Application 15721) & Permit 13935 (Application 17232)

Purpose of Use – WCWD has petitioned to add Irrigation, Frost Protection and Heat Control to the already authorized Municipal use defined in Permit 13935 and License 67931. Approximately 10% of the reported water use between 1986 and 2001 has been for district agricultural connections. WCWD estimates, based on the previous 15 years of use, the agricultural water demand will not exceed 135 acre-feet per year for use on over 200 acres of vineyard and pears.

Point of Diversion – WCWD has requested the addition of the Burke Hill Well Field site, that encompasses Wells #7 and #8, as an authorized point of

diversion to both License 6793 and Permit 13935. The well field is located as follows:

By California Coordinate System of 1927, Zone 2, North 521,015 feet and East 1,665,790 feet, being within the NE¼ of NE¼ of projected section 9, T14N, R12W, MDB&M.

Place of Use – WCWD has petitioned to amend its place of use to include water delivery to neighboring communities. WCWD has an Emergency Interconnection Agreement (EIA) with the City of Ukiah for the emergency service of water. The agreement stipulates that if the other entity requires water on an emergency basis, with proper notice, water will be provided to said entity. The intent of the EIA is to improve the reliability of water service to each entity's customers in times of an emergency and/or equipment failure, to combat a fire, to allow for maintenance or repair, or in the case of water system contamination. The City of Ukiah also has an EIA with Millview County Water District which provides for the same arrangement

The petition requests expansion of the place of use under License 6793 and Permit 13935 to include the service areas of the City of Ukiah, Millview County Water District, and Calpella County Water District, described as follows:

Within the boundaries of the City of Ukiah, and Millview, Willow, Calpella County Water Districts being within the projected Sections 15-17, 20-22 and 27-36 of T16N, R12W, MDB&M; Sections 1 and 12, T15N, R13W, MDB&M; Sections 2-11, 16-21 and 28-33 of T15N, R12W, MDB&M; and projected Sections 3-10 and 15-16 of T14N, R12W, MDB&M as shown on map on file with the SWRCB.

Talmage, CA 95481

Source: Russian River tributary to Pacific Ocean

Points of Diversion: (1) North 4,350 feet and West 1,150 feet from SE corner of projected section 15, T14N, R12W, MDB&M, being within NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of said section 15  
(2) North 2,800 feet and West 700 feet from SE corner of projected section 15, T14N, R12W, MDB&M, being within SE $\frac{1}{4}$  of NE $\frac{1}{4}$  of said section 15  
(3) North 1,950 feet and West 100 feet from SE corner of projected section 15, T14N, R12W, MDB&M, being within NE $\frac{1}{4}$  of SE $\frac{1}{4}$  of said section 15  
(4) North 300 feet and East 1,600 feet from SW corner of projected section 14, T14N, R12W, MDB&M, being within SE $\frac{1}{4}$  of SW $\frac{1}{4}$  of said section 14  
(5) South 1,200 feet and West 2,250 feet from NE corner of projected section 23, T14N, R12W, MDB&M, being within NW $\frac{1}{4}$  of NE $\frac{1}{4}$  of said section 23

Purposes of Use: License 11989 – Irrigation, Heat Control, and Stockwatering  
License 13408 – Frost Protection

Direct Diversion  
Rate and Season of  
Diversion: License 11989 – 1.47 cubic feet per second from May 1 to November 1 of the succeeding year  
License 13408 – 13.4 cubic feet per second from about March 1 to May 31 of the succeeding year

Place of Use: License 11989 – 227 acres within projected section 14, 15, and 23, all within T14N, R12W, MDB&M  
License 13408 – 175 acres within projected section 14, 15, and 23, all within T14N, R12W, MDB&M

Existing Project: Points #3 and #5, are currently the primary sources of water supply for the two licenses. Point #3 consists of two 2,500 gallon per minute (gpm) diesel pumps and Point #5 is an electrical centrifugal pump with a capacity of 1,020 gpm. All three pumps, according to the licensee, are operating with fish screens on the intake pipes and are in compliance with sections 1601, 1603, and/or 6100 of the Fish and Game Code.

Water is pumped from the Russian River and conveyed through a series of 6" and 10" pipes to an overhead irrigation and frost protection dispersal system covering 175 acres of vineyard. Additionally, 50 acres along the riparian corridor are irrigated periodically for bank stabilization and habitat purposes.

As a result of a recent license inspection performed by Division of Water Rights staff, Point of Diversion #3 was found to have been moved approximately 1,000 feet from the authorized point of diversion. A petition for change in point of diversion was required.

Aside from the point of diversion changes, licensee was found to be in compliance with the terms of both licenses.

Petition for Change: Licensee petitioned to add the onstream reservoir authorized under License 12634 located as follows, North 100 feet and West 2,600 feet from the SE corner of projected Section 14, T14N, R12W, MDB&M, being within the NW¼ of SW¼ of said Section 14 as point of redirection of water diverted under License 13408 and 11989. Licensee also requested to change the description of Point of Diversion #3 to a point described as follows, North 1,370 feet and East 650 from the SW corner of projected section 14, T14N, R12W, MDB&M, being within the NW¼ of SW¼ of said section 14.

Environmental Document: An environmental document has not yet been prepared for the action described in this notice.

all within T13N, R11W, MDB&M as shown on maps on file with the  
SWRCB.

Existing Project: Licensee is authorized to directly divert 0.61 cfs from two points of diversion on the Russian River during May 1 through November 1 for irrigation of 56 acres. The license also provides that , “as long as there is no interference with other rights, junior, as well as senior, Licensee may increase his rate of diversion to a maximum of 2.63 cubic feet per second; provided that the total quantity diverted in any 30-day period does not exceed 36.6 acre-feet.” The water is served to the 56 acres of vineyard.

Petition for Change: Licensee petitioned to change the place of use under License 10356. 23.5 acres will be eliminated from the original place of use and be developed elsewhere, however, the total acreage will remain at 56.0. The new place of use will be described as follows:

2.5 acres within NW $\frac{1}{4}$  of NW $\frac{1}{4}$  of section 29,  
16.5 acres within NW $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 29,  
5.0 acres within NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 29,  
3.5 acres within SW $\frac{1}{4}$  of NW $\frac{1}{4}$  of section 29,  
2.0 acres within SW $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 29,  
3.0 acres within NW $\frac{1}{4}$  of SW $\frac{1}{4}$  of section 29,  
1.5 acres within NE $\frac{1}{4}$  of SE $\frac{1}{4}$  of section 30,  
8.0 acres within NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 30,  
14.0 acres within SE $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 30,  
all within T13N, R11W, MDB&M.

There will be no change in the existing points or rate of diversion. Fish screens are installed at the points of diversion. Any order issued pursuant to this request will contain a term requiring Licensee to install a flow meters on the Licensee’s diversion facilities.

Environmental  
Document:

An environmental document has not yet been prepared for the action described in this notice.

Related Applications: In addition to water right License 10356 (Application 21516), the Licensee holds water right Permit 17388 (Application 24141), Application 31040, Livestock registration L031353, and Statement of Water Diversion and Use (S008163).

**APPLICATION 24804**

**LICENSE 17425**

**ISSUED ON August 10, 1978**

---

Permittee: Big Basin Water Company  
P.O. Box 197  
Boulder Creek, CA 95006

Sources: (1), (2), (5) Unnamed Stream tributary to Jamison Creek thence  
Boulder Creek  
(3), (4) Unnamed Stream tributary to Boulder Creek thence  
San Lorenzo River

Points of Diversion: (1) NW $\frac{1}{4}$  of NW $\frac{1}{4}$  of section 14, T9S, R3W, MDB&M  
(2) NW $\frac{1}{4}$  of SW $\frac{1}{4}$  of section 14, T9S, R3W, MDB&M  
(3) SW $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 23, T9S, R3W, MDB&M  
(4) NE $\frac{1}{4}$  of SE $\frac{1}{4}$  of section 23, T9S, R3W, MDB&M  
(5) NW $\frac{1}{4}$  of SW $\frac{1}{4}$  of section 14, T9S, R3W, MDB&M

Purposes of Use: Domestic and Fire Protection

Direct Diversion  
Rate and Season of  
Diversion: 0.52 cubic feet per second from January 1 to December 31

Storage Amount and  
Season of Diversion: 10 acre-feet from January 1 to December 31

Max Annual Amount: 335.25 acre-feet per water year (October 1 to September 30 of the  
succeeding year)

Place of Use: Within the boundaries of the Big Basin Water Company (BBWC) in  
Sections 2, 11, 12, 14, 15, 23, & 24, T9S, R3W, MDB&M, as shown on  
maps on file with the SWRCB.

Existing Project: Permit 17425 authorizes year round direct diversion of 0.52 cubic feet per  
second and storage of 10 acre-feet from five points of diversion (POD).  
Water is diverted at POD's #1 and #2 from Jamison Springs and carried  
through pipes to a 2000-gallon regulating tank. From the 2000-gallon  
regulating tank, water can either be piped to Jamison Reservoir or a  
5,000-gallon regulating tank. Water from Corvin Spring (POD #3) is  
diverted and carried by a pipe into another 2000-gallon regulating tank and  
then can also travel either to Jamison Reservoir or a 5,000-gallon regulating  
tank. Forest Spring is identified as POD #4, however, permittee is not  
presently diverting water from this POD. Jamison Reservoir is identified as  
POD #5. Jamison Reservoir has been situated in such a manner that it does

not block the stream channel of the unnamed stream nor does it divert any flow from the stream. Additionally, BBWC diverts from three groundwater wells to supply their service area.

BBWC's wintertime operation diverts water into the reservoir where it is stored and/or pumped to the water treatment plant. BBWC's summer-time operation diverts water into the regulating tanks and then pumps it to the water treatment plant. The reservoir is not used during the summer months due to taste and odor concerns from algae growth. The reservoir serves as a fire protection supply.

The BBWC currently provides water to 575 service connections. 40 of these connections were found to be outside of the permitted service area, in an adjacent, 120-acre subdivision (Galleon Heights). These homes have been served by BBWC since 1981, following a ruling of the Santa Cruz Local Agency Formation Committee.

**Petition for Change:** Permittee has petitioned to increase the place of use under Permit 17425 to add approximately 120 acres, known as the Galleon Heights Subdivision, to the Big Basin Water Company's service area. The Galleon Heights Subdivision is located within the SW¼ and NW¼ of section 13, T9S, R3W, MDB&M.

**Extension of Time:** Permittee requests an extension of time to develop full beneficial use of water under this permit. The calculated maximum amounts put to beneficial use to date include continuous diversion of up to 0.32 cfs by direct diversion and collection of 4.6 acre-feet of water to storage for a total annual use of 201 acre feet of water.

**Environmental Document:** An environmental document has not yet been prepared for the action described in this notice.

**Related Applications:** Statement 8439 filed for riparian use from Corvin Spring.  
Statement 8440 filed for riparian use from Jamison Spring.  
Statement 8439 filed for riparian use from Forest Spring.

## NOTICES WITHIN THE COUNTY OF SHASTA

---

**APPLICATION 29685**

**PERMIT 20764**

**ISSUED ON December 9, 1994**

---

**Permittee:** John F. Rotter and Theresa Rotter  
2841 Oak Creek Drive  
San Ramon, CA 94583

Source: Unnamed Stream tributary to N.F. Cottonwood Creek thence Cottonwood Creek

Point of Diversion: NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 34 T30N R6W MDB&M

Purposes of Use: Irrigation, Fire Protection, Recreational, and Stockwatering

Storage Amount and Season of Diversion: 27 acre-feet from December 1 to March 31 of the succeeding year

Place of Use: At the Reservoir located within SW $\frac{1}{4}$  of SW $\frac{1}{4}$  of Section 26, SE $\frac{1}{4}$  of SE $\frac{1}{4}$  of Section 27, NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of Section 34, NW $\frac{1}{4}$  of NW $\frac{1}{4}$  of section 35 T30N R6W MDB&M. Irrigation of 6 acres located within the NE $\frac{1}{4}$  of NE $\frac{1}{4}$  of section 34 and NW $\frac{1}{4}$  of NW $\frac{1}{4}$  of section 35 T30N R6W MDB&M as shown on maps on file with the SWRCB.

Existing Project: The permittee is authorized to collect 27 acre-feet in a reservoir located on an unnamed stream for irrigation, fire protection, recreational, and stockwatering uses. The reservoir has been constructed and has collected water to storage.

Extension of Time: Permittee requests an extension of time to develop full beneficial use of water authorized under this permit. The permittee has not developed the irrigation usage to date .

Environmental Document: An environmental document has not yet been prepared for the action described in this notice.

Related Applications: License 12917 (Application 28799) authorizes Permittee to store 3 acre-feet per annum at the same reservoir.
